

PHISHING DETECTION & AWARENESS REPORT

Future Interns – Cyber Security Internship

Prepared By:
Sidhanth Achar

Tools Used:
Email Header Analyzer
Browser Tools
Public Phishing Samples

INTRODUCTION

Phishing is one of the most common cyber attacks targeting businesses and individuals. Attackers use fake emails, malicious links, and social engineering techniques to steal credentials, passwords, and sensitive information.

This project focuses on identifying phishing indicators and improving user awareness through ethical email analysis.

OBJECTIVE

- Analyze phishing email samples
- Identify phishing indicators
- Classify email risks
- Explain phishing techniques
- Provide prevention recommendations
- Build user awareness

TOOLS USED

- Email Header Analyzer
- Browser Inspection Tools
- Public Phishing Email Samples
- Google Docs / Canva

Purpose:

To analyze suspicious emails and identify phishing indicators safely and ethically.

SAMPLE EMAIL 1

Subject:

⚠ Urgent: Your Account Will Be Locked

Key Indicators:

- Suspicious link
- Generic greeting
- Urgent language
- Fear-based messaging

Risk Classification:

PHISHING EMAIL

```
Subject:
Urgent: Your Account Will Be Locked

Email Body:

Dear User,

We noticed suspicious activity on your account.
To avoid account suspension, please verify your details immediately.

Verify Now:
http://secure-account-verify.com

Failure to verify within 24 hours will result in permanent account lock.

Regards,
Security Team
```

ANALYSIS OF SAMPLE 1

Identified Indicators:

- Suspicious verification domain
- Urgency tactics
- Social engineering
- Potential credential theft risk

Business Impact:

Users may unknowingly share passwords or sensitive information through fake login pages.

Overall Risk:

HIGH

SAMPLE EMAIL 2

Subject:

Important Notice Regarding Your Recent Login

Key Indicators:

- Generic greeting
- Suspicious link
- Fear-based wording
- Unverified domain

Risk Classification:

SUSPICIOUS EMAIL

Subject:

Important Notice Regarding Your Recent Login

Email Body:

Dear Customer,

We detected a login attempt from a new device.

If this was not you, please review your account activity immediately.

Review Activity:

<http://account-security-check.net>

Thank you,

Account Support Team

ANALYSIS OF SAMPLE 2

Identified Indicators:

- Suspicious login verification request
- Misleading domain
- Social engineering attempt

Business Impact:

Users may be redirected to fake websites designed to harvest credentials.

Overall Risk:

MEDIUM

RISK CLASSIFICATION SUMMARY

Indicator	Risk Level
Suspicious Links	High
Fake Domains	High
Urgency Tactics	Medium
Generic Greetings	Medium
Social Engineering	Medium

PREVENTION GUIDELINES

- Verify sender addresses carefully
- Avoid clicking suspicious links
- Never share passwords or OTPs
- Use Multi-Factor Authentication (MFA)
- Report suspicious emails immediately
- Confirm urgent requests through official channels

DO'S AND DON'TS

DO:

- Verify email authenticity
- Check links before opening
- Use strong passwords
- Keep systems updated

DON'T:

- Click unknown links
- Download suspicious attachments
- Share credentials via email
- Trust urgent threats immediately

CONCLUSION

This phishing detection and awareness assessment identified multiple phishing indicators, including suspicious domains, urgency tactics, misleading links, and social engineering methods.

The report highlights the importance of cybersecurity awareness and cautious email handling in reducing phishing-related risks.

The analysis was conducted ethically for educational and awareness purposes only.

THANK YOU
